

# Interconnected Places Lab Internship (HIST 1907)

FALL 2026

This three-credit undergraduate internship, offered by the Institute for Spatial History Innovation (ISHI), supports student research by training interns to investigate historical places and trace their connections across local, regional, and global networks. Interns complete a semester-long research project that begins with an in-depth study of a single place and expands outward to examine its links to migration, labor, infrastructure, memory, ecology, and contested boundaries. No prior experience with historical research or digital methods is required.

During the internship, students will develop:

- Historical research and digital storytelling skills, culminating in a published project
- Experience in digital humanities methods using GitHub, QGIS, Leaflet, and Java
- Skills in spatial analysis and digital mapping

Undergraduate students interested in the Fall 2026 internship should complete the following application form:

<https://forms.gle/kvp7wC3M1kTL9cwB6>

Applicants will be asked to propose a place of study and briefly explain their reason for selecting that place.

**Apply by April 7, 2026 for guaranteed review of your application!**

The internship will meet weekly on Wednesdays from 11:00AM–1:00PM during the fall semester. Please contact [ISHI@pitt.edu](mailto:ISHI@pitt.edu) with any questions.
